

WAX REMOVER FOR SOLVENT-BASED WAXES

Original name: Rimuovicera

Product Description

The Novecento Rimuovicera is a wax remover for solvent-based waxes ideal for dissolving and removing the old layers of wax that have accumulated over time on furniture, floors, beams, woodworks etc... It removes even shellac-based varnishes, oil finishes and our Venetian Plaster Wax from the walls. It is fast-acting and it does not affect the wood patina. New and very pleasant scent!

Use

Apply with a cotton cloth or with Novecento 0000 scourer pad (4 zeros, extra-thin), let it work for 5 minutes and then gently rub until the wax won't come off leaving a matte surface. Clean properly the surface with a cotton cloth. It is not necessary to rinse.

In case of very thick layers of wax repeat the operation.

Let it dry completely before applying the chosen finishing.

To remove the wax applied on venetian plasters walls we highly recommend to remove it as explained before and then energetically sand the surface so to make the wall ready for a new treatment (new wax or paint).

Coverage: 10-12 m²/L
