CHIMNEY BREAST WITH GIMCYN

Non-flammable acrylic water-based paint

COVERAGE: 5 sq metre (53 sq feet) per unit

DILUTION: Ready to use, do not dilute

TOOLS: Brush and decor sponge

Touch dry in 30 minutes, completely dry in 8 hours

HOW TO APPLY:

After the appropriate primer has been applied by a short pile or mohair roller and is completely dry (in 2-3 hours) apply a single coat of Gimcyn by brush, with a criss-cross technique. Leave as it is for a brushed effect or move the texture (grain) of the paint with a decor sponge to create a distressed look. Due to the drying time, create the effect in sections, roughly 0.25 sq metre (2-3 sq feet) at a time.

GIMCYN is a metallic paint with iridescent or pearly particles that creates a stunning textured wall finish with a subtle sheen.

It's a cost-effective and easy-to-apply alternative to wallpapers, is seamless and hardwearing. Can be applied in a variety of ways by a professional applicator and it's also extremely easy to repair it.

Gimcyn is ideal for domestic or commercial projects that need that special 'high-end' touch.
