

TECHNICAL DATA SHEET

TERRA VERDE ANTICA

DESCRIPTION

It is a green earth from the Prun area (Verona). Processing includes purification, drying, and grinding with paddle mills. Sought after in the artistic field for its characteristic semi-transparency.

Composition	Ferrous and ferric silicates of potassium, manganese, aluminum plus iron oxides
Micro features	Large, rough, inhomogeneous particles
Granulometry	30/40 Micron
Origin	Verona/Italy
Color	Green
Covering power	6 (GOOD)
Light stability	7 (EXCELLENT)
Moisture stability	6 (GOOD)
Stability in lime	6 (GOOD)
Chemical stability	6 (GOOD)
Indicated for use	INDOOR AND OUTDOOR
Fields of use	fresco - lime - cement - casein - water-based glues - oil - encaustic

*SCALE OF VALUE : from 1 (min) to 8 (max)
